**** Excluding IPO Shares, Preferred Shares, Closed Companies, and Non-Bahraini Companies. Prices of Highlighted Companies are in USD, while Traded Value and Market Capitalization data is in BHD. 1 USD = 377 Bahraini Fils**

Notes:

NM: Not Meaningful. NA: Not Available. Trailing P/E is calculated on the earnings for TTM 1H-12 and current prices. Trailing P/B is based on 30 -June-2012 equity and current prices. Current Yield for individual stocks is based FY 2011 DPS & current prices. Valuation multiples for companies that have not yet disclosed their financials for 1H-12 are still based on the earnings for Q1-12 and equity as of 31-Mar-12. DTD:daily change. MTD: Beginning of Current Month to Date YTD: Beginning of Year to Date. BD:Bahraini Dinar. * Companies that vary in their fiscal years are treated separately to adjust for recent results announcements. DTD % change in sectors and total market is based on the daily change in market capitalization which might not conform with the benchmark return.

We have excluded the net losses incurred by Gulf Finance House while calculating the Price-to-Earnings Multiple (P/E) for the aggregate market and its respective sector.

Beta is the tendency of a security's returns to respond to swings in the market. A beta of 1 indicates that the security's price will move with the market. A beta of < 1 means that the security will be less volatile than the market. A beta of > 1 indicates that the security's price will be more volatile than the market. For example, if a stock's beta is 1.1, it's theoretically 10% more volatile than the market. Beta is calculated based on the daily share price returns versus BB General Index for the companies which have a minimum trading history of 1 year. Low Beta is mainly due to light trading activities as most of the stocks that have relatively low beta are rarely traded in the market.
