Source: Amman Stock Exchange Website & Reuters.

Notes: NM: Not Meaningful. NA: Not Applicable. Trailing P/E calculated based on the TTM 1H-11 earnings and current market capitalization. Trailing P/B is based on equity figures as at 30-June-11 and current market capitalization. Current Yield for individual stocks is based on Cash Dividend Per Share for Full Year 2010 and current market capitalization. DTD % change for individual stocks is based on the change in average closing prices as being provided by Amman Stock Exchange. DTD % change in sectors and total market is based on the daily change in market capitalization (market capitalization is calculated based on the Avg. Closing price).

Beta is the tendency of a security's returns to respond to swings in the market. A beta of 1 indicates that the security's price will move with the market. A beta of < 1 means that the security will be less volatile than the market. A beta of > 1 indicates that the security's price will be more volatile than the market. For example, if a stock's beta is 1.1, it's theoretically 10% more volatile than the market. Beta is calculated based on the daily share price returns versus CASE 30 General Index for the companies which have a minimum trading history of 1 year.
