Notes: NM: Not Meaningful. NA: Not Applicable. Trailing P/E is calculated on the earnings for FY-11 and current prices. Trailing P/B is based on 31-Dec-2011 equity and current prices. Current Yield for individual stocks is based on FY2011 DPS & current prices. Valuation multiples for companies that have not yet disclosed their financials for FY-11 are still based on the earnings for the TTM 9M-11 and equity as of 30-Sep-2011 DTD % change for individual stocks is based on the change in average closing prices as being provided by Qatar Exchange. DTD % change in sectors and total market is based on the daily change in market capitalization (market capitalization is calculated based on the Avg. Closing price) which might not conform with the benchmark return.

Beta is the tendency of a security's returns to respond to swings in the market. A beta of 1 indicates that the security's price will move with the market. A beta of < 1 means that the security will be less volatile than the market. A beta of > 1 indicates that the security's price will be more volatile than the market. For example, if a stock's beta is 1.1, it's theoretically 10% more volatile than the market. Beta is calculated based on the daily share price returns versus QE General Index for the companies which have a minimum trading history of 1 year.
