Source: TADAWUL Website, Thomsonreuters & KAMCO Research

Notes: NM: Not Meaningful. NA: Not Applicable. P/E is calculated based on Net Profit for the Trailing Twelve Month period ended September 2013 and current prices. Trailing P/BV is based on Shareholders' Equity as of 30 September 2013 and current prices. Dividend Yield is based on FY-2012 Cash Dividends & current prices. DTD: daily change. MTD: Beginning of Current Month to Date, YTD: Beginning of Year to Date. SAR: Saudi Riyal. * Companies that vary in their fiscal years are treated separately to adjust for recent results announcements. DTD % change for individual stocks is based on the change in last traded price as being provided by Saudi TADAWUL. DTD % change in sectors and market is based on the daily change in market capitalization (market capitalization is calculated based on the last traded price) which might not conform with the benchmark return. DTD change in market cap might not match that of the TASI as the index calculation is based on floating shares in the market. ** Turnover is calculated based on free floating capital and updated on monthly basis.

Beta is the tendency of a security's returns to respond to swings in the market. A beta of 1 indicates that the security's price will move with the market. A beta of < 1 means that the security will be less volatile than the market. A beta of > 1 indicates that the security's price will be more volatile than the market. For example, if a stock's beta is 1.1, it's theoretically 10% more volatile than the market. Beta is calculated based on the daily share price returns versus TASI for the companies which have a minimum trading history of 1 year.
